Neighbor Province To Face Sacred Aspirants In Field

Co-Operative Commonwealth Federation's Leader Makes Report on Futile Interview With Alberta Premier

NORTH BATTLEFORD, Sask., April 5.—Premier Aberhart of Alberta rejected co-operation with Co-operative Commonwealth Federation forces for the forthcoming Saskatchewan election and Social Credit candidates will be nominated in every constituency, according to a report read here last night by G. H. Williams, Saskatchewan C.C.F. leader.

ABOLITION OF LOCAL POLICE IS SUGGESTED

Ald. Casselman Says Big Saving Certain If "Mounties" Given Job

Reduction of \$60,000 in salaries alone could be effected if Edmonton abolished the police department as at present constituted and entered into an agreement with the Dominion government for the policing of the city by the Royal Canadian Mounted Police, Ald. Fred C. Casselman told city council at a special meeting Monday night.

CANUCK APPEALS TO PRIVY COUNCIL MAY BE ENDED

OTTAWA, April 5.—Prime Minister Mackenzie King today gave notice in the house votes and proceedings of a resolution to give precedence next Friday to reading of a bill of Hon. C. H. Cabot to abolish Canadian appeals to the judicial committee of the privy council.

The bill would repeal two acts of the United Kingdom insofar as they apply to Canada and are incorporated in Canadian law and permit appeals to the privy council from judgments in Canadian courts.

BLUM DEMAND THROWS DEPUTIES IN WILD UPROAR

PARIS, April 5.—Premier Leon Blum's demand for sweeping powers to control France's economic life by decree today threw the Chamber of Deputies into such an uproar that its president, Edouard Herriot, suspended the session.

Many political observers predict it will cause his new cabinet to resign. Lefebvre, Blum's supporter, rose in a body and advanced his rights, shouting, "Down with Herriot!"

They were stopped by others. Rightists shouted at "Herriot the Ghetto Heriot" suspended the session.

1938 CROP TO GET BIG START WITH MOISTURE

CALGARY, April 5.—Alberta today has sufficient moisture reserve in the soil to insure a big start for the 1938 crop, a "flying start," provincial agronomist, told the Calgary Herald today. They said the snow of last week and two additional inches last night had penetrated the ground where it had melted, and the run-off is being held in ponds and other natural reservoirs.

Even in the recognized drought areas extending from the United States border from near of Glenora to the far north as Promont there is at least moisture reserve in many places.

She Mourns For Once A Happy Home

A woman, who once was a tenant in the building, ruefully surveys all that is left of a Barcelona apartment house after aerial raiders had reduced the building to ruins. More than 1000, a great number of whom were children, died in the series of raids on the city that brought prospects from six nations and from Pope Pius XI.

Levy Made On All Production To Aid Municipal Bodies

Printed Copies of Production Tax Act, Introduced Last Week, Are Distributed For Perusal of Legislature

Under terms of the new Production Tax Act, introduced into the legislature by Hon. Lucien Maynard, minister of municipal affairs, the Alberta government becomes the owner of seven per cent of all agricultural produce, grown in the province.

Authority for the transfer of this percentage of produce is granted in a section which reads: "On, from and after the first day of January following the month in which this Act is proclaimed to be in force, seven per cent of the gross value of all agricultural produce shall, as and from the moment upon which the same comes into being, be levied in this province, to be used in such manner and for such purposes as are hereinafter provided."

Introduction of this bill is a long step forward in the government's plan to re-align the whole taxation system and to shift it from the land to those places where it can best be borne.

First reference to the bill includes a provision for a reference to the supreme court of Alberta for a test of validity prior to its coming into force.

Introducing the bill last week, prior to the distribution of printed copies, Mr. Maynard declared that his operation would not, in view of the reference to the supreme court and the fact that the next session of the legislature will be gathered until autumn.

Title of the new production tax is "An Act to Vest in the Crown in

BURGULARS ARE BIT SCORNFUL OF OLD ADAGE

VANCOUVER, April 5.—Burglars who looted Johnston's shoe store here last week-end doubt the wisdom of the adage "crime doesn't pay."

"They added two words to a pamphlet, issued by the store, advertising a 'crime doesn't pay' money play series."

They were:

"Oh yeah."

Sloan Turns In Bonus Benefit

NEW YORK, April 5.—Alfred P. Sloan, chairman of General Motors Corporation, at his own request has been eliminated from further participation in the company's annual bonus plan which returned him \$411,181 in 1936. Sloan's 1936 salary was \$130,000.

Tax Rate Set 54 Mills Households Receive Quota

Fewer Members Sought

Reduction in legislative membership from 63, as it is at present, to 53, including elimination of one member from Edmonton, one from Calgary and eight rural ridings, is advocated in a resolution, notice of which was given in the C.C.F. program on Monday by Hon. Lucien Maynard, minister of municipal affairs.

Mr. Maynard's resolution proposes that a redistribution committee be set up and bring in a report at the regular D.S. session of the house.

The committee to study the whole question of redistribution, as advocated in the resolution, would number seven.

Duties would consist of reviewing not only reduction in membership but alteration of constituency boundaries.

At the D.S. session of the house last night, Mr. Maynard moved a resolution advocating redistribution, with a reduction in house membership.

Redistribution is an old question in the Alberta and other legislatures. Both Liberal and Conservative parties have moved redistribution.

Monday night commissioners recommended adoption of 54 mills, repeating any cut in the rate would mean deflation of the economy.

Acting on this recommendation and report, council adopted the 54 mills for the year.

Classification of expenditures in

Continued on Page 2, Col. 6

Casselman Withdraws Amendment For One Mill Reduction on Understanding Strict Economies Will be Practiced

By an unanimous vote, city council Monday night met Edmonton's tax rate at 54 mills to produce property taxes totalling \$2,817,125 for the year. This is the same rate as was fixed last year, aldermen adopting it on a motion of Ald. Hugh J. Macdonald.

Council also set the quarterly tax payment installment dates at May 16, July 15, September 15 and November 15.

According to estimates brought down to commissioners, the 54-mill rate will balance the budget, estimated revenue and expenditure for the year being \$4,071,540.

Originally moving an amendment that the tax rate be reduced one mill to 53 through a \$50,000 reduction in estimated expenditure, Ald. F. C. Casselman later in the meeting withdrew this amendment on the understanding that commissioners would attempt to effect all possible economies in the civil administration as the year progressed.

Adoption of the rate found no dissenting voice in the council.

Last week on a motion by Ald. J. H. Ogilvie, aldermen referred estimates back to commissioners to pare them by \$50,000 in order to reduce the tax rate to 53 mills, if possible.

Monday night commissioners recommended adoption of 54 mills, repeating any cut in the rate would mean deflation of the economy.

Acting on this recommendation and report, council adopted the 54 mills for the year.

Classification of expenditures in

EAST VETERAN MAY CANCEL PILOT WINNER M'KEE TROPHY

Romeo Vachon, Quebec Airman, Awarded Coveted Aviation Honor

OTTAWA, April 5.—A flier since the early 1930s and instrumental in developing air services along the north shore of the Gulf of St. Lawrence in recent years, Romeo Vachon last night was awarded the M'Kee trophy for service to Canadian aviation during 1937.

In making the announcement, Defence Minister Ian Mackenzie said Vachon "throughout his career has been outstanding in his dual capacity of pilot and air engineer."

"It was due to his foresight and administrative ability that there exists today the efficient and necessary air service along the north shore of the Gulf of St. Lawrence," the minister added.

"Mr. Vachon's qualifications for the award is not dependent on any spectacular feat in aviation, but on the more solid basis of years of untiring effort which has earned the admiration and regard of everyone connected with aviation in Canada."

The trophy, a handsome silver award, is annually presented to the Canadian flier who makes outstanding contributions to aviation in the Dominion. It was do-

IAN MACKENZIE AVERS HALIFAX IS NOT ROBBER

Minister Defence Deplore Reports—Secrecy Will be Rigidly Enforced

By THOMAS WATLING

Revelation to Edmonton Bulletin

OTTAWA, April 5.—Characterizing a report from Halifax that the defence measures of that port were being rolled for the benefit of the west coast, Hon. Ian Mackenzie, minister of national defence, explained the details of the transfer to the Pacific coast.

"The minister deplored the broad transfer across Canada of the resources of the Pacific coast, as provided in a bill introduced into the legislature on Monday by Hon. N. E. Fagan, minister of lands and mines."

Further details were not given to the house by the minister and are not expected to be disclosed until the bill is passed.

This legislation follows those which set up a valid defence agreements between Dominion and provincial governments in regard to administration of natural resources.

These agreements enabled the province to allow loans granted to the Dominion government prior to the return of the natural resources to the province in 1938.

Conservation of the oil and gas resources of the province is a major item in the government program. A long step forward in this and was taken last week by Mr. Fagan, when he carried out the sale of the Turner Valley wells.

The board of three in the establishment will be divided into certain powers in respect to the conduct of the oil and gas industry.

MEETING PLACE PICCADILLY HAS NUMBER POSTS

LONDON, April 5.—London has simplified the meeting problem. Piccadilly, the government has been the meeting place of millions. But that has been the trouble for the business of the crowds. Now the authorities have erected three brightly painted standard signs for the numbers 1, 2 and 3 and "waiters" queue up at the appointed number.

Malcolm MacDonald Believes Dominions Agree With Britain Policy

TAX RATE OF 54 MILLS IS SET FOR CITY

Continued from Page One

The 1938 budget follows: Departmental operation, \$125,000; direct relief, \$445,140; city's share of municipalities, \$119,740; hospitals, \$14,280; Royal Alexandra hospital grant, \$60,000; bank interest and exchange, \$100,000; telephone interest and redemption, \$80,000; local improvement taxes on forfeited property, \$150,000; public school board, \$185,200; library board, \$30,000; discount allowed on taxes, \$47,000; contingencies, \$67,805; total, \$1,671,540.

REVENUE
Estimated revenue is classified as follows: Departments, \$317,000; gas franchise, \$40,000; city block rents, \$7,725; auditors, \$10,000; taxes and surpluses from utility departments, \$1,105,000; penalties, \$40,000; business tax, \$250,000; provincial contribution in lieu of service tax, \$30,000; property taxes (at the 54-mill rate), \$2,847,125; total, \$4,671,540.

Recommendations against any reduction in the estimates as prepared by them, commissioners warned council Monday that the following reductions could be made but they would impair services: City block operation, \$10,000; engineering department, \$5,000; road, \$10,000; sewer, \$10,000; fire department, \$10,000; Royal Alexandra hospital, \$5,000.

"These reductions, if effected, would amount only to a saving of a mill, and the remaining \$30,000 could only be obtained by taking money on a loan, which would be a relief cut. It should be remembered that relief is subject to fluctuations according to the amount of government aid," commissioners stated.

NO CASH NEEDED
"It has to be taken into consideration that the various services of the city have been reduced in the past seven or eight years, with the result that larger outlays are now necessary to meet extraordinary repairs and maintenance. Particularly is this noticeable in the engineering department, and the extra appropriations requested will begin to make up the deficiencies of the past several years. It is perhaps not generally known but constant are the almost daily demands for road improvements, and the abatement of the dust nuisance, and it is felt that nothing would do more to improve the amenities of the city than moderate expenditures in this direction, if this can be effected without any increase in the tax rate.

"Beneficial results accruing from such a policy, in the opinion of your commissioners, must far outweigh the advantages to be derived by the taxpayers from the deletion of a fraction, or even a mill, from the mill rate.

EQUALIZE RATE

"Coming to the direct question of the tax rate, both for 1938 and 1939, the commissioners are strongly of the opinion if the tax rate in the present year is reduced below the figure of 54 mills proposed, that it will not be possible to maintain the reduction in the succeeding year, and therefore feel that it would be the better policy to take a two year view-point, and ensure as far as possible an equalization of taxation, with some assurance of safety.

"This conclusion was only reached after a careful study of what is proposed, such as probable reduction in assessment, the effect of further restrictions of salaries and wages, increasing school costs, provision of signal and radio facilities in the police department, further loss in local improvement taxes of forfeited properties, increased departmental charges consequent upon authorized airport facilities, 142nd street bridge, further small pieces of work which are sure to come before council during the year, and other general works directly chargeable to the tax rate.

FALSE STANDARD

"It would appear that the mill rate has become a false standard, and the total levy is the figure that should be stressed. The information conveyed in the following table is most pertinent at the present time and we believe, whatever rate council may decide upon, publicity should be given to it—

"It may be argued that while the population has increased, the number of taxpayers remains more or less constant, but nevertheless there are more shoulders to bear the burden—indeed, the number of large residences that have been converted into suites to help meet taxes, better housing conditions, etc.

"We sincerely trust that council may see its way clear to maintain the present mill rate until the financial horizon clears."

FINANCE SERVICES

Speaking to the commissioners' report, Mayor John W. Fry said commissioners were recommending the 54 mill rate "because it would be dangerous to go lower than that. It would mean a reduction in necessary services."

Disagreeing, Ald. J. T. McClelland maintained departmental expenditures, exclusive of salaries, could

Beauty Hidden But Judges Exposed It

Selecting beauty queens of the 15th annual Mid-west Beauty Trade show in Chicago, judges decided to pick their women first and make "be" beautiful afterward. So they selected the three girls at the top of their "hidden beauty and personal charm."

Then the experts went to work, and below you see the same girls after their "hidden beauty" had been brought into the open. At the left is Alice Kallies, 20, Eleanor Kowalewski, 20, is right. And Shirley Mathew, 18, centre, turned out to be the "Hidden Beauty Queen."

By reduced 10 per cent. without affecting services given. He made an exception in the case of the engineering department, which he proposed should be called upon to reduce its expenditure only five per cent.

"Without reducing services or salaries," queried Mayor Fry. The alderman pointed out that there had been increases in expenditure in many departments since 1935, and felt that some reductions in cost could be made.

MOVES 54 MILLS

Ald. MacDonald then moved that the estimates be adopted and the tax rate struck at 54 mills.

Mayor Fry reminded council that Edmonton property-holders were reaping some "benefits" through the progressive decrease in the tax levy—\$27,811 drop, 1938 alone as compared to 1937.

Ald. F. C. Caselman: "Yes, and that's due to high mill rates and confiscation of property. There are less burdens now."

Ald. A. Blaiset claimed the mill rate was not the most vital issue in civic financing. "I don't think it would be wise to cut the mill rate this year. There are too many indefinite factors at the present time. If we cut the rate for this year, and something unexpected happens next year's council will have to raise the rate. Then there'll be trouble," he said.

Referring to the application of

REDUCTION IN MEMBERSHIP HOUSE MOVED

Continued from Page One

With reference to the wage cut restoration of a flat 35 a month for civic employees effective from September last, Ald. Caselman maintained there was "no rhyme or reason in this 35 increase, and we should be more like to make an election move."

Ald. MacDonald reminded the council last year had not voted on the 1937 elections, having still another year to serve.

BIG EXPENSE

Ald. McClelland stated that within the next five years an expenditure of \$800,000 would be required for rehabilitating city power plant equipment. As there would be no way of knowing what was likely to happen as far as the city's relief costs were concerned, "We have got a government at the bottom of the hill that is going on in a silly, lame, destructive and I might say self-sufficiency, and we may look for worse economic conditions, more people on relief and higher relief costs for the city," he stated.

Ald. Douglas Groat said that if council reduced the mill rate under 54 "we will be cutting off our nose to spite our face." He believed council could expect further increases to be made in the administration later in the year.

RELIEF COSTS

Commenting on salary scales, the alderman declared that in the main salaries for new employees were too high. "I don't want contracts broken with present employees, but I believe there should be a reduction in the present salary scale for new employees coming into the service," he said. "There should be a fairer relative base between the departments."

Pointing out another possible method of reducing expenditure, Ald. Caselman remarked that if Edmonton took advantage of the Dominion government's R.C.M.P. system, doing away with the police department as at present constituted, a saving in salaries of \$50,000 a year could be made.

RATE TOO HIGH

The alderman declared that while the majority of people agreed the burden of taxation on real property should be lightened, a one-mill cut in the rate was being protested on

HOUSE BEATS LABOR MOTION GO TO VOTERS

tion in the house, and D. M. Duggan, Alberta Conservative leader, has been active in this respect. The last redistribution in Alberta was carried out in 1938, when the strength of the house was increased by three. At that time Edmonton and Calgary each were given another seat.

CLIVER BAR

Cliver Bar was the other constituency added at that time. Several of the new constituencies, for instance the Nanaimo-Columbia constituency, was formed out of the two white Okanagan High River was formed from two.

TEXT OF NOTICE

Text of the notice of motion follows: "Whereas by resolution of this assembly passed on March 1937, the government was requested to bring in legislation at this session of the assembly to provide for the following changes, namely: "(a) A substantial reduction in the number of members of the House of Commons at this time."

"(b) The boundaries of provincial constituencies to have due regard to geographical, industrial and community interests.

"(c) A system of voting to provide representation of minority groups."

HOUSE MOVED

"A reduction in the number of members with portfolios and the appointment of a number of minority without portfolio, whose appointment shall be governed by their qualifications to represent one or more of the cities, agricultural and industrial interests of the province, together with geographical representation of minority groups."

SHOULD BE MADE

"And whereas the government feels that the membership of the assembly could be reduced and that the allocation of boundaries of electoral divisions should be made by a redistribution committee of the assembly.

"Now, therefore, he it resolved that: "(1) The number of members of this assembly be reduced from 52 to 33."

"(2) This reduction be on the basis of one each for the cities of Calgary and Edmonton and eight from rural districts."

CENTRE OF EMPIRE

Great Britain's strength, he said, was based not only upon her wealth, her military and naval strength and the temper of her people, but also upon the fact she is a foreign policy to the electorate and she is the centre of the world.

HOUSE WILL STUDY

Privy Appeal Bill

OTTAWA, April 5.—The government, it was learned Monday, has set aside Friday for a full day's consideration of the private bill introduced in the House of Commons by Hon. C. H. Cahan (Cons., St. Lawrence), which would abolish appeals to the privy council in Canada.

Expand Trade Pact

CAPE TOWN, April 5.—South Africa's £400,000,000 (\$2,000,000,000) trade agreement with Germany is to be further expanded. Under a supplementary agreement the Reich will buy additional South African goods to the value of more than £500,000.

Veteran Councillor

HALIFAX, April 5.—H. M. Bailey of Port Dufferin, eldest member of the Halifax council in years of service, has never been defeated in the 31 years he has been a member of the organization. He has served under eight wardens and held the position once himself.

Chinese Making
